

Product Stewardship Policy

As part of our commitment to environmental sustainability Hyperseal Australia undertakes to conduct its business in a socially and environmentally responsible manner by implementing this Product Stewardship Program. Its purpose is to ensure that all those involved in the manufacturing, selling, using and disposing of our products, do so in an environmentally sound manner by:

- Making the protection of health, safety and the environment an integral part of the product development.
- Providing all relevant information regarding the safe use and disposal of our products.
- Being responsive to any concerns of our community, customers, employees and other stakeholders.
- Complying with all legal requirements relative to our operations and our products.
- Actively participating in the maintaining and developing of attainable environmentally friendly standards and work procedures.

Hyperseal Australia has made a commitment to its clients to accept the return of its products, wherever practical, at the end of its serviceable life for the purpose of reusing, reprocessing and recycling the product. Hyperseal Australia is further committed to reusing and recycling our own on-site waste to ensure all waste associated with our products is diverted from landfill wherever possible.

To perpetuate this commitment, Hyperseal Australia, should it be required, will enter into an arrangement with a suitable recycling company to recycle the product back into the rubber recycling stream.

Should the client wish to participate in the Product Stewardship program, they are requested to notify Hyperseal Australia of their intent by completing the attached agreement, and forwarding it to the company, to set out a platform to begin negotiation so as to facilitate the initiation of the program between both parties.
